

Automatic and Seamless Card Updates

Expired credit card information is costly and time-consuming for merchants, particularly for recurring billing and subscription-based services.

Paysafe's Account Updater service saves merchants time and money, and reduces customer churn rates.

Account Updater automatically updates credit card holder details such as card expiration dates, card holder contact details and card numbers, helping merchants to maintain an uninterrupted revenue stream and preventing service disruptions.

Merchant Benefits

- **Uninterrupted recurring billing** - No need to request for customer information when cards expire
- **Prevent subscription cancellations** – Automatic card detail updates reduce the risk of customer subscription cancellations
- **Enhance customer service** – Improve customer satisfaction by reducing negative experiences associated with card declines

How it works

Easy to implement

Account Updater is integrated directly into Paysafe's proprietary gateway.

Minimize Risk

Receive automatic updates on cards that have been canceled due to fraud or account closure.
